National Center for Health in Public Housing (NCHPH)

- The National Center for Health in Public Housing (NCHPH) is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under grant number U30CS09734, a National Training and Technical Assistance Partner (NTTAP) for \$2,006,400 and is 100% financed by this grant. This information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.
- The mission of the National Center for Health in Public Housing (NCHPH) is to strengthen the capacity of federally funded Public Housing Primary Care (PHPC) health centers and other health center grantees by providing training and a range of technical assistance.

Health Centers Close to Public Housing

- 1,373 Federally Qualified Health Centers (FQHC) = **30 million patients**
- 458 FQHCs In or Immediately Accessible to Public Housing = **5.7 million patients**
- 108 Public Housing Primary Care (PHPC) = **911,683 patients**

Session content objectives

Through an examination of the literature and engagement in case studies we will review the following:

1. Review evidence-supported frameworks for implementing health and housing partnerships.
2. Perform an overview of methodologies for practical health/housing partnerships.
3. Take a practical view of the limitations and challenges in health/housing partnerships.

Case study :

Mrs. Torres is a 67 year-old female with a PMH significant for T2DM, CKD stage I and hypertension. She presents at her primary care office for her annual wellness examination and to receive refills for her prescriptions. She denies any acute health issues.

At intake, vitals and an SDOH screener are performed per facility protocol.

The results are as follows:

HR: 82 bpm

BP: 140/86

R: 22 per min.

Results from her previous exam 6 months ago are as follows:

HR: 62 bpm

BP: 120/78

RR: 18 per minute

The intake nurse indicates that Mrs. Torres appears diaphoretic and nervous.

Case study :

Mrs. Torres' SDOH Screener displays the following results:

Appendix

WellRx Questionnaire

DOB 11/30/56 Male ___ Female ~~___~~

WellRx Questions

-
1. In the past 2 months, did you or others you live with eat smaller meals or skip meals because you didn't have money for food?
___ Yes ~~___~~ No
2. Are you homeless or worried that you might be in the future?
~~___~~ Yes ___ No
3. Do you have trouble paying for your utilities (gas, electricity, phone)?
~~___~~ Yes ___ No
4. Do you have trouble finding or paying for a ride?
~~___~~ Yes ___ No
5. Do you need daycare, or better daycare, for your kids?
___ Yes ~~___~~ No

Case study :

Mrs. Torres' SDOH Screener displays the following results:

6. Are you unemployed or without regular income?

Yes

No

7. Do you need help finding a better job?

Yes

No

8. Do you need help getting more education?

Yes

No

9. Are you concerned about someone in your home using drugs or alcohol?

Yes

No

10. Do you feel unsafe in your daily life?

Yes

No

11. Is anyone in your home threatening or abusing you?

Yes

No

The WellRx Toolkit was developed by Janet Page-Reeves, PhD, and Molly Bleecker, MA, at the Office for Community Health at the University of New Mexico in Albuquerque. Copyright © 2014 University of New Mexico.

Case study:

In the examination room Mrs. Torres is seen by a NP who reviews her vitals, recent lab results and performs a physical examination.

Laboratory results indicate the following:

Sodium: **149 mmol/L** (136-145)

Potassium: **3.7 mEq/L** (3.5-5.2)

BUN: **24 mg/dl** (5-20)

Crt: **145 mg/dL** (61.9-114.9)

Phos: **3.7 mg/dL** (1.12-1.45)

Mrs. Torres's physical examination was unremarkable save some mild shaking and nervousness.

Case study:

When interviewed regarding her SDOH screener, Mrs. Torres mentions the following.

- She lives at home with her husband and adult daughter.
- She is the only source of income. Her hours were cut by 20% 6 months ago.
- Since then, her family has lived on savings, which are now gone.
- Her family has struggled to meet rent. She was evicted once in her early 30s. She is overwhelmed by fear that this could happen again.

Mrs. Torres is examined for and diagnosed with Generalized Anxiety Disorder (GAD) and Major Depressive Disorder (MDD) during her visit. She is started on Citalopram, an SSRI antidepressant. She is networked to social services, who schedule a consult with her for next week.

Please Consider the following Questions:

1. How are Mrs. Torres' non-medical challenges impacting her chronic diseases (T2DM, CKD I)?
2. What type of services could be helpful in supporting Mrs. Torres?
3. How should these services be delivered?

Health and Housing: Evidence

Three Out of Four Low-Income At-Risk Renters Do Not Receive Federal Rental Assistance

The poorest renters face a far greater risk than other households of eviction, homelessness, and other hardship. With **limited funds**, federal **rental assistance** programs can only help 23 percent of these at-risk renters afford modest housing.

Key takeaways:

- Access to safe, affordable housing is a major contributor to the SDOH.
- Poor access to these resources can have a particularly for those experiencing chronic disease states.
- Supporting access to housing has a strong measurable impact on health outcomes.

Abstract

[Go to:](#) ▶

Background

The proportion of the United States population with chronic illness continues to rise. Understanding the determinants of quality of care—particularly social determinants—is critical to the provision of care in this population.

Objective

To estimate the prevalence of housing and food insecurity among persons with common chronic conditions and to assess the independent effects of chronic illness and sociodemographic characteristics on (1) housing and food insecurity, and (2) health care access hardship and health status.

Key takeaways:

- 36.71% of the chronically ill experience housing insecurity.
- The presence of cardiovascular or lung disease increases the likelihood of experiencing housing insecurity by 69%.
- The presence of cardiovascular or lung disease increases the likelihood of experiencing housing insecurity by 75%.

[Link to Resource](#)

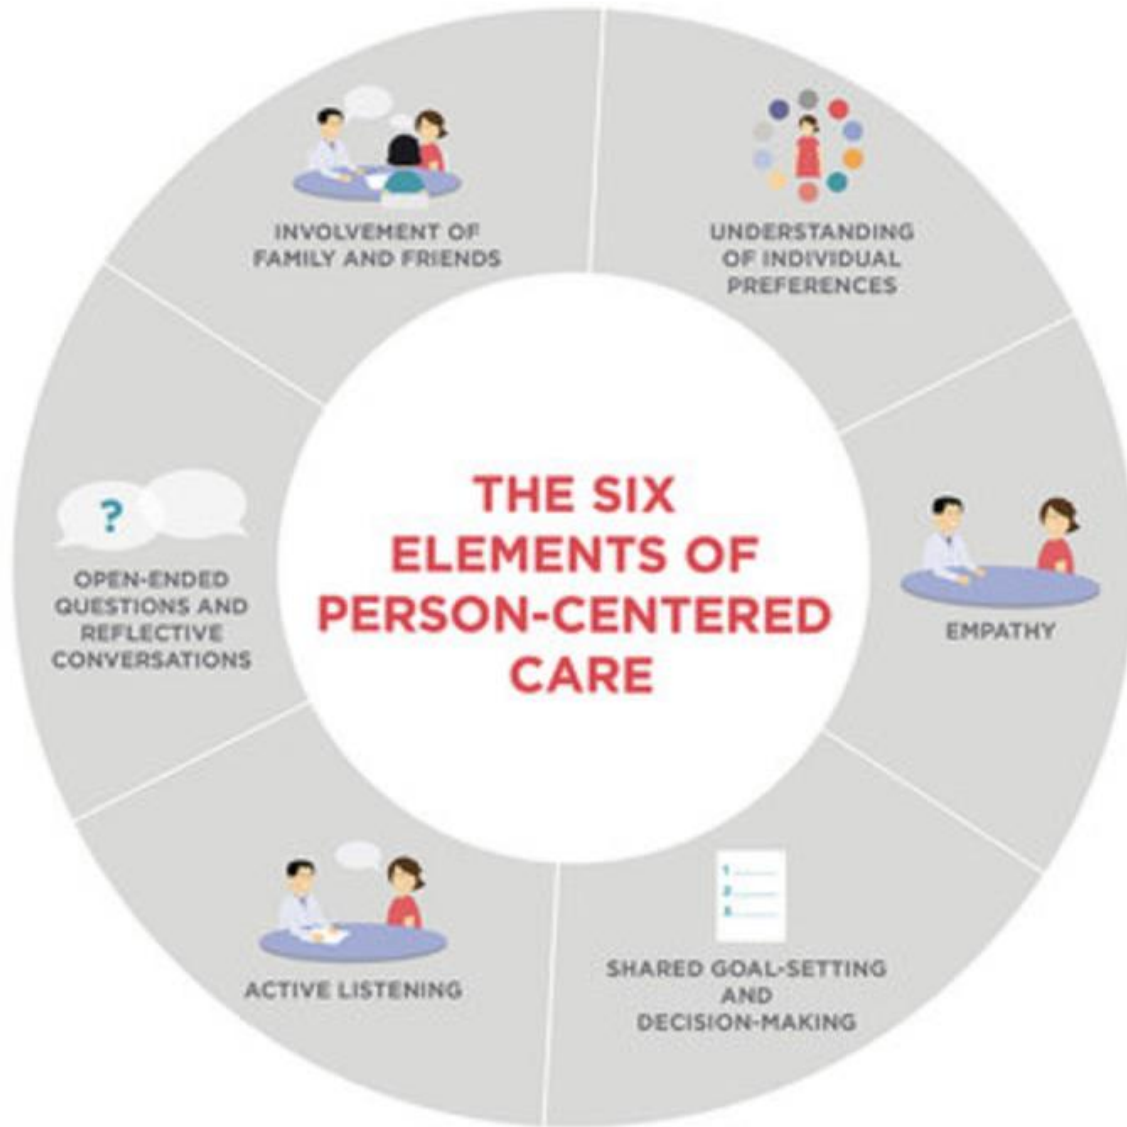

Health and Housing: Evidence

[Link to Resource](#)

Key takeaways:

- Access to safe, affordable housing is a major contributor to the SDOH.
- Poor access to these resources has an outsized impact on individuals experiencing chronic disease states.
- Supporting access to housing has a strong measurable impact on health outcomes.

Six elements of Person-Centered Care

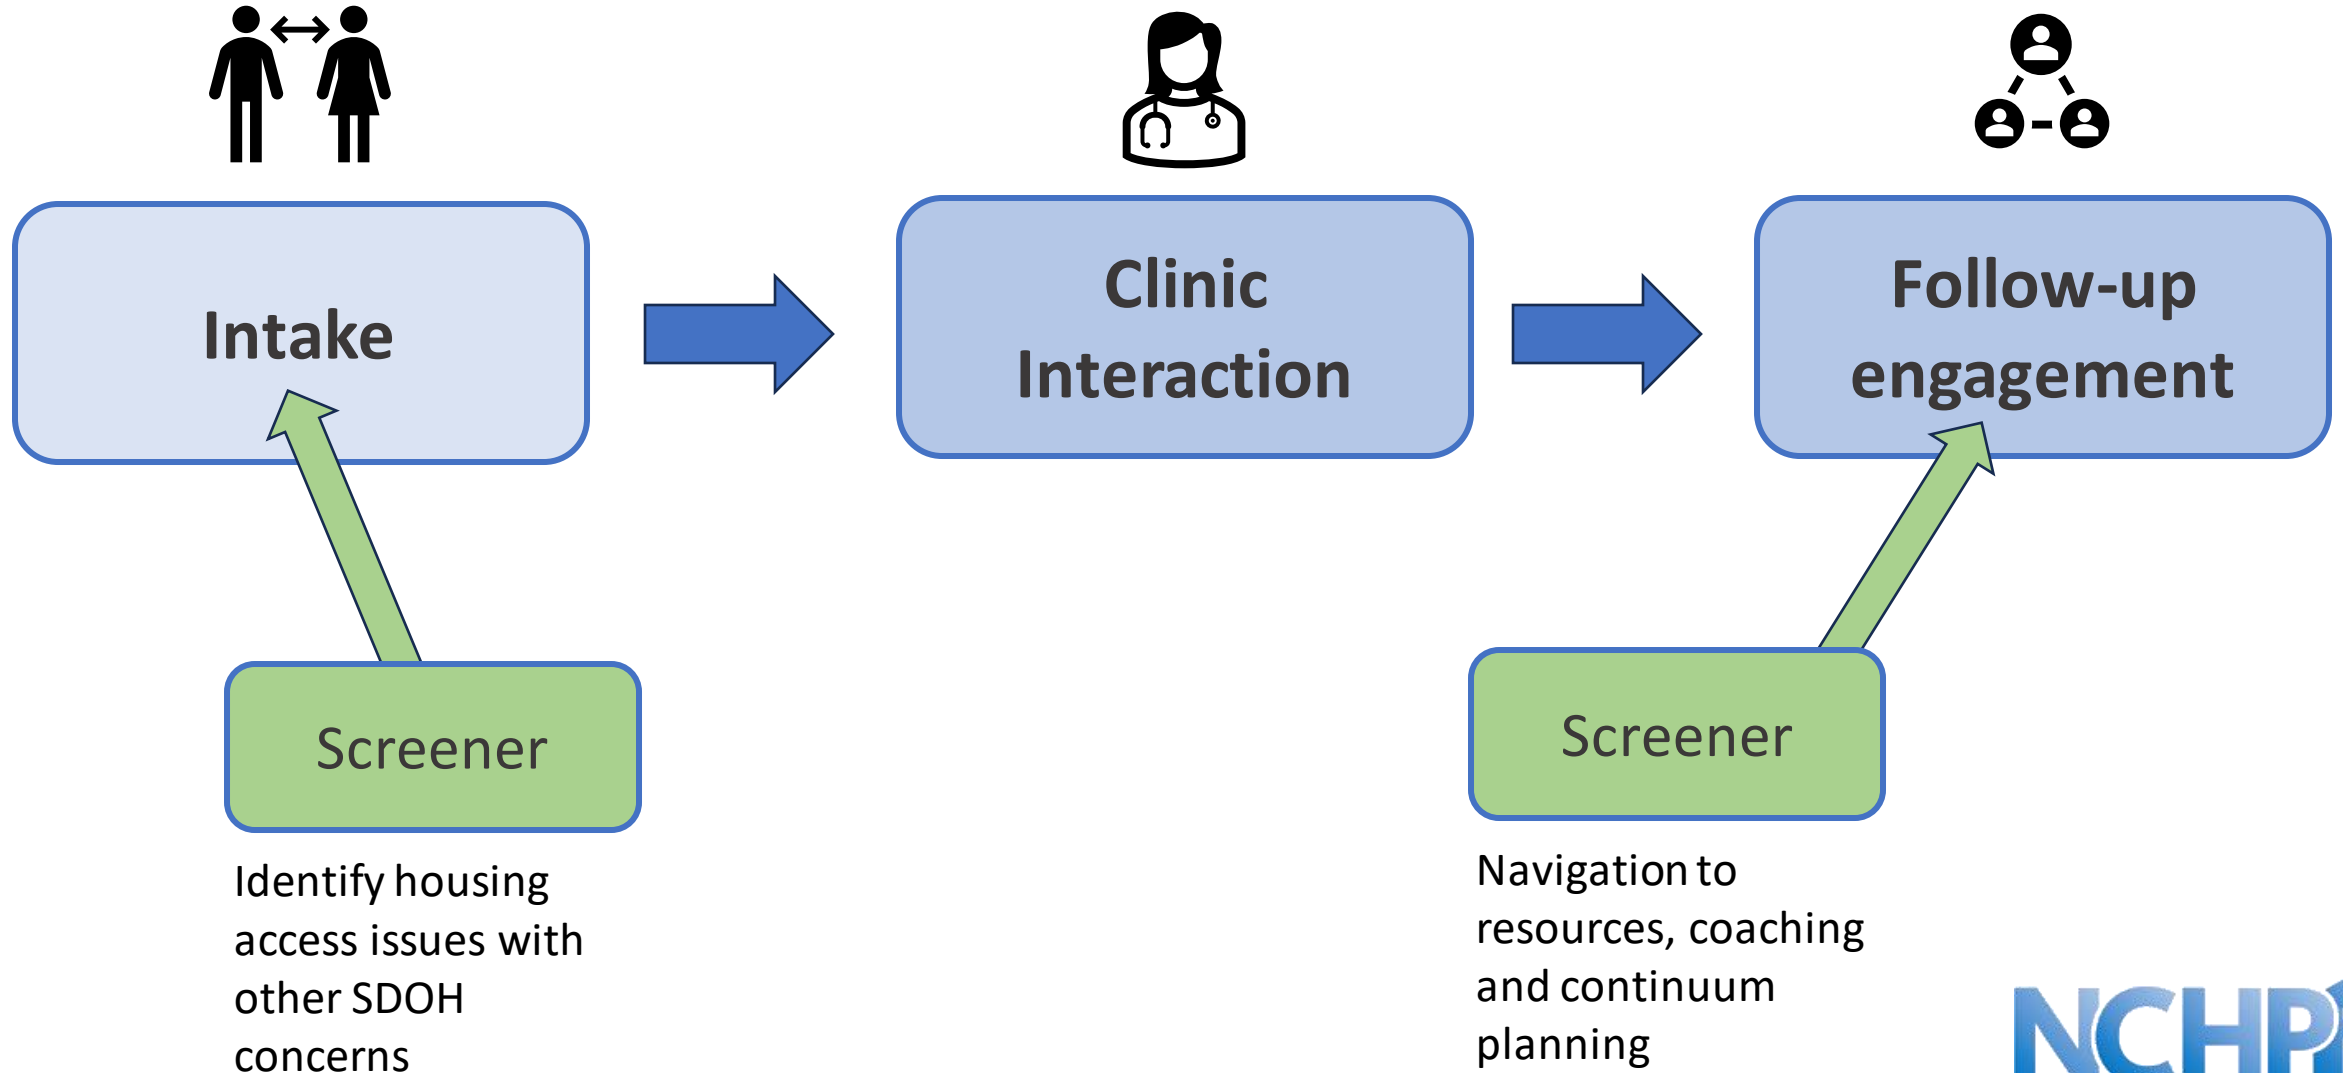

1. Involvement of Family and Friends.
2. Understanding of individual preferences.
3. Empathy.
4. Shared goal-setting and decision-making.
5. Active listening.
6. Open-ended questions and reflective conversations.

Promising practices for support housing access

1. Support HUD voucher recipients through strengthening partnerships with local property owners.
2. Form partnerships with local/regional ROSS-SC grant recipients.
3. Strengthen relationships with your local housing administration.
4. Support staff knowledge of the SDOH and their implications on your population.
5. Increase your understanding of community housing stock and limitations.
6. Support the expansion and development of CHW and related staff.

Partnership Opportunities: ROSS-SC Grant Recipients

The screenshot shows the U.S. Department of Housing and Urban Development website. The header includes the department logo, the text "U.S. Department of Housing and Urban Development", and navigation links for "About Us" and "What We Do". A search bar is also present. Below the header is a secondary navigation bar with links for "PIH Home", "About PIH", "Public Housing", "Housing Choice Vouchers", "Real Estate Assessment Center", and "More". The main content area features a breadcrumb trail: "Home / Program Offices / Public and Indian Housing / PIH / Public Housing / Resident Opportunities and Self-Sufficiency (ROSS) - Public Housing Programs / About the Resident Opportunity and Self-Sufficiency (ROSS) Grant Program". The title of the page is "ABOUT THE RESIDENT OPPORTUNITY AND SELF SUFFICIENCY (ROSS) GRANT PROGRAM". The text below the title states: "In the past, the ROSS grant has included programs such as ROSS-Family & Homeownership and ROSS-Elderly/Persons with Disabilities. Since FY08, these programs have been combined into one ROSS-Service Coordinators program." A sub-section titled "ROSS-Service Coordinators" follows, with a paragraph explaining the program's purpose: "The purpose of the ROSS Service Coordinator program is to provide funding to hire and maintain Service Coordinators who will assess the needs of residents of conventional Public Housing or Indian housing and coordinate available resources in the community to meet those needs. This program works to promote the development of local strategies to coordinate the use of assistance under the Public Housing program with public and private resources, for supportive services and resident empowerment activities. These services should enable participating families to increase earned income, reduce or eliminate the need for welfare assistance, make progress toward achieving economic independence and housing self-sufficiency, or, in the case

ROSS-SC Supports the following services:

1. Resident Needs Assessments.
2. Coordination and Service Delivery.
3. Case Management/Coaching.
4. Resident Engagement.
5. Evaluation.
6. Reporting.

Funding CHW Staff:

Key takeaways:

- Nine states have authorized CHW funding through their state insurance plans for specific services.
- Four states (CA, LA, NV, RI) initiated this coverage in 2022.
- Four additional states (IL, KY, MI, NY) will begin implementing coverage in 2023.

FY23 Omnibus Budget Bill (passed)

Sec. 1616. (1) By September 30 of the current fiscal year, **the department shall seek federal authority to formally enroll and recognize community health workers as providers and to utilize Medicaid matching funds for community health worker services, including the potential of leveraging of a Medicaid state plan amendment, waiver authorities, or other means to secure financing for community health worker services.** The appropriate federal approval must allow for community health worker services on a **statewide** basis and must not be a limited geography waiver. The authority should allow the application of community health worker services statewide and maximize their utility by providing financing that includes fee-for-service reimbursement, value-based payment, or a combination of both fee-for-service reimbursement and value-based payment for all services commensurate to their scope of training and abilities as provided by evidence-based research and programs.

(2) By September 30 of the current fiscal year, the department shall report to the senate and house appropriations subcommittees on the department budget, the senate and house fiscal agencies, the senate and house policy offices, and the state budget office on the progress of meeting the requirements in subsection (1).

Discussion Question

Please take a moment to consider the following:

Your health center is considering altering an existing SDOH screener to improve information regarding housing access in your community.

This effort is in the context of an ongoing partnership between an FQHC and Housing Administration.

Which questions would you add to the screener to better assess housing access in your community?

Screening for Social Determinants of Health in Populations with Complex Needs: Implementation Considerations

By Caitlin Thomas-Henkel and Meryl Schulman, Center for Health Care Strategies

IN BRIEF

With the recognition that social determinants of health (SDOH) can account for up to 40 percent of individual health outcomes,¹ particularly among low-income populations, their providers are increasingly focused on strategies to address patients' unmet social needs (e.g., food insecurity, housing, transportation, etc.). This brief examines how organizations participating in *Transforming Complex Care (TCC)*, a multi-site national initiative funded by the Robert Wood Johnson Foundation, are assessing and addressing SDOH for populations with complex needs. It reviews key considerations for organizations seeking to use SDOH data to improve patient care, including: (1) selecting and implementing SDOH assessment tools; (2) collecting patient-level information related to SDOH; (3) creating workflows to track and address patient needs; and (4) identifying social service resources and tracking referrals.

Compared to other industrialized nations, the United States spends much less on social services, and much more on health care.² This is true despite evidence that social determinants of health (SDOH) — including income, educational attainment, employment status, and access to food and housing — affect an array of health outcomes,³ particularly among low-income populations.⁴ Individuals with unmet social needs are more likely to be frequent emergency department (ED) users, have repeat 'no-shows' to medical appointments, and have poorer glycemic and cholesterol control than those able to meet their needs.⁵

Takeaways:

Screening tools should be adapted to meet the following:

- Capacity to address specific SDOH needs.
- Availability of local resources and referral networks.
- Ease of use within clinical setting (workflow).
- Ability of tool to capture needs the organization can realistically address.
